

**AIDS and Other Human Diseases**  
**Intd 219**  
**Epidemiology Worksheet**

1. In your groups, discuss and interpret the key data in the study on hemophiliacs and the link between HIV and AIDS. Write down the key data and your interpretation of the data.
2. Discuss and interpret the key data in the study on drug abuse and the link between drug abuse, HIV, and AIDS. Write down the key data and your interpretation of the data.
3. Discuss the evidence, from these studies and other sources, that supports the idea that HIV causes AIDS?
4. **Homework - Due Tuesday, October 29**  
**Read Chapter 2 in AIDS Update 2002 for more information.**
  - A. Plot the key results on Excel as a bar graph.
  - B. Explain the interpretation of your data as asked in questions 1 and 2.
  - C. Give five pieces of evidence that support the idea that HIV causes AIDS.
